

SHANKA KOTHTHAGODA

Data Engineer / BI Developer

CONTACT

-  +46 73 677 3482
-  shanka.ko95@gmail.com
-  Borlänge, Sweden
-  <https://www.linkedin.com/in/shankakoththagoda/>

SKILLS

- **Programming & Data Engineering:**

Python, SQL, data pipelines/workflows, data validation, data transformation, Docker, Azure DevOps, Jira
- **Visualization & Machine Learning:**

Power BI, MySQL, relational databases, SQL queries, data quality control, data analysis, machine learning, pandas, NumPy
- **Machine Learning & AI:**

TensorFlow, Pandas, machine learning model development, AI-assisted workflows
- **Data Integration & APIs:**

REST APIs, Swagger, Postman, external system integrations, interface testing, system connectivity validation, Azure DevOps

PROFESSIONAL OVERVIEW

Data Engineer with 5+ years of experience across software industry including data workflows, system integration, data quality, automation, and software development.

COMPETENCIES

Python, R, Power BI, Data Bricks, Microsoft SQL Server, SSIS, Machine Learning, Statistical Analysis

WORK EXPERIENCE

Digital Content Automation Developer

Clas Ohlson AB | November 2024 – July 2026

- Developed automation and data-quality solutions for product information and digital content workflows across multiple Nordic markets.
- Built Python- and AI-supported workflows to extract, transform, validate, enrich, standardize, and prepare product data for downstream publication.
- Automated recurring data-processing workflows involving product descriptions, translations, images, article numbers, Safety Data Sheets, and supporting documentation.
- Worked with business stakeholders to translate manual processes into reliable, repeatable, and maintainable data workflows.
- Improved product-data quality and consistency across Nordic markets while reducing manual processing and data-entry errors.

Python

ML Libraries

Data Pipelines

Process Automation

Programming and UI/UX Consultant

Fidet | June 2023 - August 2024

- Worked with an IoT-focused technology startup developing connected smart-home and hydroponic products.
- Supported software development for a connected smart-home switch, collaborating with developers on back end, UI/UX, and system-related design decisions.

- **Automation & Testing:**
Pytest, Selenium, Cypress, Cucumber, Appium, PyAutoGUI, Jasmine, JMeter
- **Development & Delivery:**
Git, Bitbucket, Jenkins, Azure Devops, Docker, Jira, CI/CD

LANGUAGES

English – Professional
Swedish – Intermediate (B2)

Mahesh Chathuranga

Solutions Architect
Hitachi Energy
maheshpcjt@gmail.com
+46 728781827

- Designed and supported implementation of mobile and web interfaces for WIZDOT and Project Hydronect, integrating connected devices, smart controls, and data-driven user experiences.

Python

SQL

UI/UX

Android

JavaScript

Java

Quality Assurance Automation Engineer

Vetstoria | June 2018 - June 2023

- Developed automated data-validation and integration-testing solutions for a platform connecting veterinary clinics, booking applications, APIs, mobile systems, and external practice-management platforms across Europe and the United States.
- Designed and maintained Python- and Java-based automation frameworks for APIs, web/mobile applications, databases, and third-party system integrations.
- Built a Python-based BDD framework supporting 50,000+ automated validation scenarios, with reusable components for scalable data and integration validation.
- Developed automated checks for REST API payloads, status codes, business rules, booking data, and end-to-end data exchange.
- Integrated automated validation into CI/CD pipelines using Jenkins, Git, Bitbucket, Docker, and scheduled execution.
- Investigated data-processing and integration failures and performed root-cause analysis across data quality, APIs, external systems, application logic, environments, and automation code.
- Validated data-driven application behavior and system integrations.
- Collaborated with cross-functional engineering teams, supported releases, and mentored junior engineers and interns.

EDUCATION

Master's Program in Business Intelligence: Microdata Analysis

Dalarna University | Jan 2025 - Jan 2026

Thesis project: Developed an AI-based conversational mental-health assessment tool using PHQ-9, GAD-7, and ASRM scoring methods.

Knowledge and skills gained: Python, NLP, ML Libraries including Matplotlib, Pandas, TensorFlow, etc. RStudio, Power BI, Data Visualization, Statistical Analysis

BEng (Hons) Software Engineering

University of Westminster | Jan 2016 - Jan 2020

Dissertation project: Developed a travel-guidance optimization system using machine learning-based image-processing techniques.

Knowledge and skills gained: Programming, Machine Learning, Computer Science, Advanced Mathematics, Networking, Requirements Analysis
